

Data Sheet

Dimensions, cross-section

Note: all units are millimeters

Weight

XX Lbs/foot, XX kg/m

Description

SFB-105 is a single sided light box using high output LED light bars, which attach to the light box extrusion with simple thumbscrews, and plug together to create a uniform bright lighting. Assembly is quick and easy and because there are no bulky light panels, these light boxes break down and pack or store in one small case, offering considerable savings on shipping.

Applications

Freestanding, wall mounted or suspended for retail environments, restaurants, museums, airports and trade shows.
