FLOOR LAMP

UP + DOWN LIGHTING

WITH MOTION AND DAYLIGHT SENSORS!

Variable color temperature! Dim to warm with LumenWarm LEDs.

The aluminum Light Task floor lamp is designed with intelligent lighting control, daylight adjustment and movement detection. You can configure these controls to your liking and the lamp will automatically turn on when sensing your presence and adjust its lighting output so that a relatively constant level of illumination is maintained throughout the day. Its straight and clean lines will give a modern look to your decor.

FEATURES

- Configurable daylight sensor and motion sensor.
- Daylight adjustment directly and indirectly.
- Regulation of amount of light when absent, resuming automatically by motion sensor.
- Manual dimming available for room light (indirect light) and direct light.
- With LumenWarm *dim to warm* LED technology.

TOUCH PANEL

THE TOUCH PANEL HAS THREE AREAS:

Middle area: On / Off switch or adjust in color temperature in Tunable White.

A brief tap on this area turns the light on, automatically adjusting it to the last stored values. Press the button again briefly to switch off the light and to save the set values. Long touching the center area will adjust the color temperature in Tunable White. You can change the direction of the adjustment by pressing the button again longer.

Upper area: indirect light **Lower area:** direct light

A brief tap will turn the light on and off. By prolonged contact, the respective light is dimmed, let go at the desired brightness. You can change the dimming direction by pressing the button again longer.

WITH SEPARATE UP & DOWN CONTROLS LIGHT TASK GIVES YOU MANY OPTIONS.

You can also control the intensity and colour temperature!
