Lighting Calculation study

Luminergie 8448 7ieme avenue, Montreal, Quebec, Canada, H1Z 2V1
tel.: 514-448-1574 e-mail: info@luminegie.com

DISCLAIMER: Calculations have been performed according to IESNA & CIE standards and goodpractice. Some differences between measured values and calculated results may occur due to tolerances in calculation methods, testing procedures, component performance, measurement techniques and field conditions such as voltage and temperature variations. Input data used to generate the attached calculations such as room dimensions, reflectances, furniture and architectural elements significantly affect the lightingcalculations. If the real environment conditions do not match the input data, differences will occur between measured values and calculated values.

Project name : DEK Hochey

Prepared for: Jean Pierre Riendeau

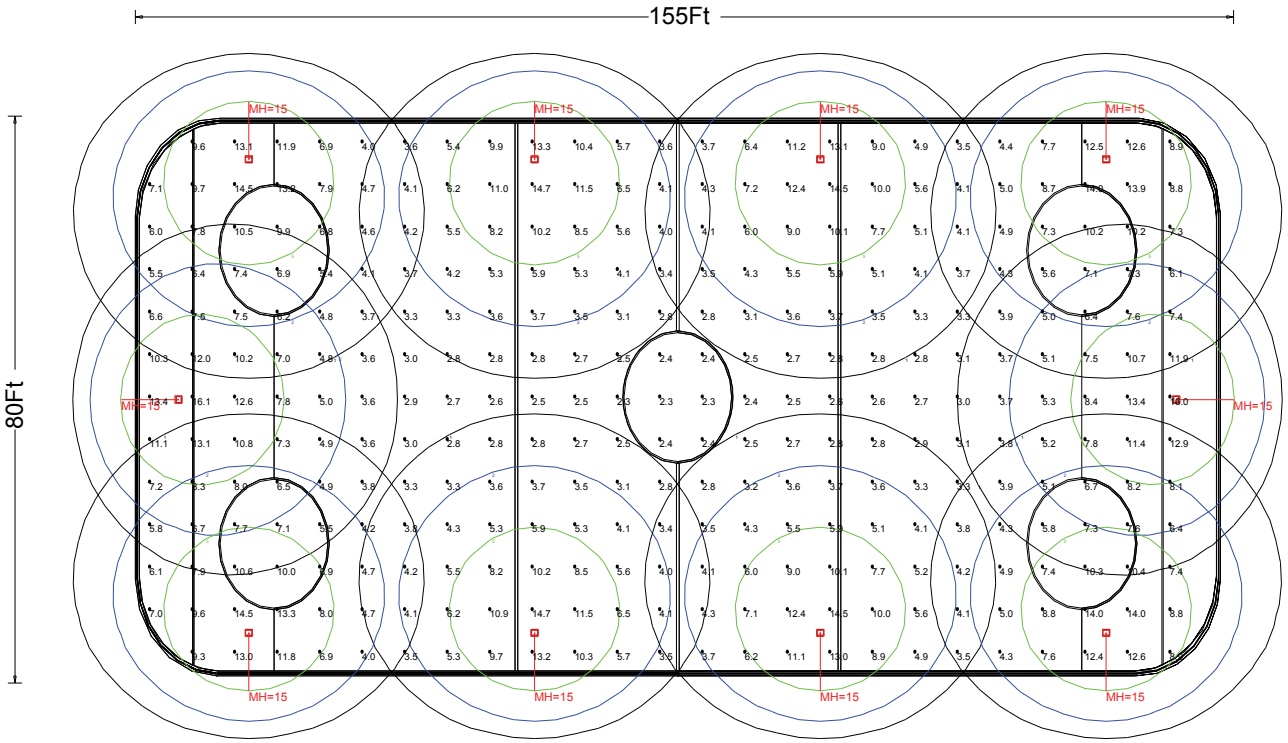
Filename: Dek Hochey.AGI

By : Peer Eric Moldvar | **Units: Feet/Inches**

Date:2/8/2010

AGi32 Version 2.04 Rev. 1

Total Time (Hrs.): 1.03



Luminaire Schedule								
Symbol	Qty	Label	Description	Lumens	LLF	Watts	Arm	Filename
	10	SP2020	SP-2020	5.8	0.900	175.1	8	SP2020.ies

Calculation Summary							
Label	CalcType	Units	Avg	Max	Min	Avg/Min	Max/Min
CalcPts	Illuminance	Fc	6.45	16.1	2.3	2.80	7.00
